Keito eHealth is a web-based platform that enables users to access and track the progress of health metrics taken on Keito medical devices.

1. KEITO EHEALTH APP

Download the Keito eHealth application to start the vital signs monitoring process through the APP.

Download available on iOS and Android.

2. USER IDENTIFICATION

Scan the QR or barcode on the Keito device.

3. SELECTION OF PARAMETERS

Once the user has been identified by the Keito eHealth system, Keito self-service medical device will start measuring the health parameters selected.

4. MEASURING PROCESS

After the measuring process, the user receives the current health report on their smartphone and the user's health data history is updated.

5. EVOLUTION OF THE VITAL SIGNS

The readings are recorded in the Keito eHealth system and will be available in the App.
